Design — Easy navigation	✅	Fixed navbar with anchor links
Design — Mobile-friendly / responsive	✅	Breakpoints at 1024px, 768px, 480px

Score: 26/26 requirements met ✅

🚀 Deliverables

File	Description
`KaroPitch.jsx`	Complete landing page — single React file, ready to render
`README.md`	This file — DoD checklist, setup guide, design rationale
`SUBMISSION_NOTE.md`	Assignment submission note (tool used + design rationale)
`DESIGN_DECISIONS.md`	Deep-dive justification of every design choice

⚙️ Setup & Deployment

Option 1 — Instant Preview (Recommended for submission)

1. Go to codesandbox.io
2. Create a new React sandbox
3. Replace `App.js` contents with `KaroPitch.jsx`
4. Copy the shareable URL → submit as your website link

Option 2 — Local Development

```
# 1. Create a new React app
npx create-react-app karopitch
cd karopitch

# 2. Install dependencies
npm install lucide-react

# 3. Replace src/App.js with KaroPitch.jsx contents
# 4. Run
npm start
```

Option 3 — Deploy to Vercel (Live URL in 2 minutes)

```
npx create-react-app karopitch && cd karopitch
npm install lucide-react
```

```
# Replace App.js with KaroPitch.jsx contents
npx vercel --prod
```

🛠 Tech Stack

Technology	Version	Purpose
React	18+	UI framework
Lucide React	0.383.0	Icon library
Syne (Google Fonts)	—	Display typography
CSS-in-JS (inline styles)	—	Component styling
CSS Media Queries	—	Responsive breakpoints

Zero external CSS frameworks — no Tailwind, no Bootstrap. Pure React + CSS for full portability.

📱 Responsive Breakpoints

Breakpoint	Layout
> 1024px	Full desktop — 4-column grids, 2-column layouts
768px – 1024px	Tablet — 2-column grids, stacked nav
< 768px	Mobile — 2-column grids collapse, hamburger menu, stacked sections
< 480px	Small mobile — compact spacing, readable typography

📁 File Structure (Modular Version)
